WORK EXPERIENCE

The Credit Pros

IT Support Engineer / IT Business Analyst November 2020 - to present

- Provided technical support and troubleshooting for hardware, software, cloud applications, and user-related issues.
- Administered and maintained Microsoft 365 services including user accounts, permissions, licenses, and cloud-based applications.
- Managed identity and access administration using Microsoft Azure Active Directory / Microsoft Entra ID.
- Supported CRM and communication platforms including Salesforce and HuduCC to ensure stable business operations and efficient customer management workflows.
- Configured and maintained SaaS applications, ensuring system availability, user access control, and operational efficiency.
- Utilized Jira and Confluence for ticket management, workflow optimization, project tracking, and technical documentation.
- Created and maintained Standard Operating Procedures (SOPs), knowledge base articles, and technical documentation to support operational processes.
- Collaborated with stakeholders and cross-functional teams to gather business requirements and recommend process improvements.
- Analyzed business processes and identified opportunities to improve system performance, workflow automation, and service delivery.
- Designed and maintained operational dashboards and KPI reports to track team performance, productivity, service metrics, and business outcomes.
- Developed KPI metrics and reporting structures to support data-driven decision-making and continuous process improvement.
- Generated reports and analytics using business and monitoring tools to identify trends, operational gaps, and improvement opportunities.
- Monitored system performance and employee productivity using platforms such as Berqun, Staffcounter, and Atera.
- Assisted in onboarding and offboarding processes including account provisioning, access management, and system setup.
- Supported communication and collaboration tools including Microsoft Teams, Acuity, and Scorecard platforms.
- Performed system monitoring, issue escalation, and root cause analysis to minimize downtime and improve operational stability.
- Delivered end-user support and training to improve user adoption, productivity, and overall user experience.
- Coordinated with internal teams and external vendors to resolve technical and operational issues efficiently.
- Contributed to continuous improvement initiatives by recommending enhancements to systems, workflows, and support processes.
- Maintained accurate records of incidents, service requests, configurations, and support activities within ticketing systems.
- Ensured compliance with organizational IT policies, security standards, and access management procedures.

- Chat GPT Training
- Excel: Master the Basics of Excel Pivots for Data Analytics

Jira Trainings Courses

1. Explore Kanban in Jira
2. Explore Scrum in Jira
3. Personalize how you work in Jira
4. Get started quickly with Jira
5. Track your work effectively in Jira
6. Get started with agile
7. Apply agile practices to manage your work
8. Get the most out of Jira

Jira Administration Courses

1. Explore Jira administration
2. Control functionality across Jira with global permissions
3. Improve user experience across Jira with global settings
4. Configure apps and integrations as a Jira admin
5. Reduce administrative work with automation
6. Make life easier with automation

Jira Spaces / Software Spaces Courses

1. Get started with Jira spaces
2. Create and maintain a Jira space to best support your team
3. Manage Jira software space roles and permissions
4. Enhance Jira space security using schemes
5. Create workflows across Jira spaces using schemes
6. Configure work items and fields across Jira spaces using schemes
7. Streamline spaces across Jira with shared configurations
8. Explore software space administration
9. Configure work items and fields in software spaces
10. Create software spaces
11. Set up Jira software spaces to enable your team

Jira Service Management Courses

1. Get started quickly with Jira Service Management
2. Manage customer requests in Jira Service Management
3. Streamline service spaces with Jira automation and integrations
4. Get the most out of Jira Service Management

Confluence Courses

1. Get started quickly with Confluence
2. Manage your content in Confluence
3. Create engaging content in Confluence
4. Get the most out of Confluence

Rovo Courses

1. Create and enhance content with Rovo
2. Get help from Rovo Search and Chat
3. Get started quickly with Rovo
4. Work with Rovo agents and build your own
5. Best practices for using Rovo
6. Get the most out of Rovo
